

Using pre-built DMR codeplugs

Author: Doug Kingston, KD7DK

Updated: 2020-04-25

This documents how to tailor a prebuilt codeplug with your personal information (radio id, call)

Software Required:

Anytone CPS, version DB878UV v1.17 or later (other versions may work but are untested)

<https://www.bridgecomsystems.com/pages/anytone-at-d878uv-support-page> (here and other locations)

Connect System CPS for CS-800D (Optional), version R4.03.07 or later

http://connectsystems.com/products/top/radios/CS800D_SOFTWARE.htm

Anytone:

1. Start CPS and open codeplug file
2. Public->Optional Setting->Power-on: Power-on Display: Update the Power-on Display text. I suggest your call on line 1 and phone number on line 2
3. Public->APRS (optional): Add your call sign and tailor other settings if desired..
4. Digital->Radio ID List: put in your Radio ID for DMR ID
5. Save codeplug file

CS-800D:

1. Start CPS and open codeplug file
2. General Settings->Setting: set Radio Alias and Radio ID to your Call and DMR id
3. Save codeplug file
